

Active Directory Users Change Password

This document depicts the installation details of Change Password of AD users.

Steps to be followed

1. Unzip the given file.
2. Run setup.exe, it will install ADChangePassword feature in web application level.
3. Activate the ADChangePassword feature through stsadm tool
 - a. Go to Run→cmd
 - b. In command prompt go to C:\Program Files\Common Files\Microsoft Shared\web server extensions\12\BIN directory
 - c. Run stsadm -o activatefeature -name <FeatureName> -url <SharePointSiteURL>
 - d. This will activate the ADChangePassword feature in the specified URL.
4. Log in to the SharePoint site. You can see the feature under the Site Actions tab.
5. Site Actions→ADChange Password. It will take you to a page, where the user can change his password by providing old and new password.
