

## FBA Users Change Password

This document depicts the installation details of ChangePassword of FBA users.

### Steps to be followed

1. Unzip the given file.
2. Run setup.exe, it will install ChangePassword feature in web application level.
3. Activate the ChangePassword feature through stsadm tool
  - a. Go to Run→cmd
  - b. In command prompt go to C:\Program Files\Common Files\Microsoft Shared\web server extensions\12\BIN directory
  - c. Run stsadm -o activatefeature -name <FeatureName> -url <SharePointSiteURL>
  - d. This will activate the ChangePassword feature in the specified URL.
4. Log in to the FBA SharePoint site. You can see the feature under the site actions tab.
5. SiteActions→Change Password. It will take you to a page, where the user can change his password by providing old and new password.
